NOMAD ARCHIPELAGO CRUISE

KOMODO NATIONAL PARK

4 NIGHTS BEYOND KOMODO CRUISE

Komodo National Park

The Komodo national park, a UNESCO World Heritage Site, is located east of Bali, an hour flight away, right close to the island of Flores.

It includes two main islands – Komodo proper and Rinca – and 27 smaller islands, spread over a marine area of some 1,750 square kilometers.

No trip to Komodo would be worth without a hike to see one or more of the famous “Komodo dragons”, the largest lizard of the animal kingdom. Their habitat is a mix of monsoon forest and open savannah, a habitat they share with buffalos, deers and a wide variety of birds.

The underwater world is at least as spectacular as the sceneries above water: this is one of the richest ecosystem on earth, being part of the coral triangle. Whether a diver or a snorkeler, no one can remain immune to the kaleidoscopic beauty of these tropical coral reefs. Throw in a few stops on idyllic beach and a visit to a welcoming village and you have a cruise you won't be close to forget.

Snorkel

Manta rays, turtles, pristine coral reefs, and warm water temperatures—snorkeling in Komodo is not to be missed.

Swimming with manta rays is one of the must-dos in Komodo, but there is no shortage of beautiful coral reefs and marine animals in Komodo either.

Situated in the Coral Triangle, the national park hosts over 1,000 species of tropical fish, 260 species of coral, and just a spectacular biodiversity overall.

Much of Komodo's underwater beauty can be observed from the surface without any scuba gear, making it an excellent snorkeling destination.

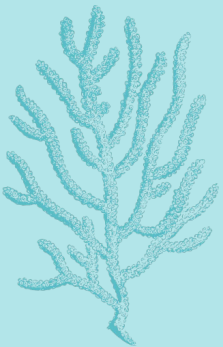

Our experienced team can take you to the best snorkeling spots within the park, at the best time, so that you can have the best time marveling at what Komodo's waters have to offer.
