

DAMAI II

Alor

Kupang to Kupang | Karang Beatrice, Rote, Sawu and Semau

The first dives along the south of Rote turned up a manta and a whale shark, which is not bad for a first time.

Alor sits where currents from both the Indian and the Pacific oceans meet, and its waters are extremely rich in big and small life.

Karang Beatrice is an extended submerged reef where sea snakes were there in surprising numbers.

West of Sawu, the small islands of Pulau Dana and Raijua are surrounded by deep ocean, with bigger life hoped for around the reefs.

The last dives, around the large island of Semau, are a chance to spot a good amount of critters.

DAY 5

West of Sawu and surrounded by deep oceans, we hope to find bigger life around the reefs of these two small islands.

Good to know

Good to know

Dive Damai can change the suggested itinerary to suit guests, if weather and time allow and everyone on board agrees
