ECOPRO DUYUNG BARU

Komodo Central and North

Labuan Bajo to Labuan Bajo | Central and North Komodo

In the dry season Central and North Komodo bring clear skies, calm seas and excellent visibility, with a high chance of manta rays, reef sharks and schooling pelagics.

Iconic pinnacles with strong currents hold sharks and jacks, and a fast-paced drift through a narrow channel is often joined by mantas.

A coral-covered seamount ranks among the best in Indonesia, and colourful reef walls sit beside rich coral gardens full of turtles and macro life.

North Komodo is known for action-packed sites, with mantas, turtles and reef sharks often seen from the surface.

A Komodo dragon walk on Rinca or Komodo Island and sunsets on deck complete it.

LENGTH	DEPARTURE PORT	ARRIVAL PORT	EXPERIENCE
7+ nights	Labuan Bajo	Labuan Bajo	Beginner to pro

Your route

THE DIVING

Diving highlights

- Crystal Rock and Castle Rock: iconic pinnacles with strong currents, sharks and jacks
- The Cauldron (Shotgun): a fast-paced drift through a narrow channel, often with mantas
- Batu Bolong: a coral-covered seamount and one of Indonesia’s best dive sites
- Tatawa Kecil and Besar: colourful reef walls and friendly currents
- Siaba and Sebayur: great for turtles and macro life

SNORKELLING

For snorkellers

This is a top-choice route for snorkellers. The northern and central reefs are shallow, colourful and full of life. Mantas, turtles and reef sharks are often spotted from the surface, and many sites are protected and calm.

ABOVE THE WATER

Beyond diving

- Komodo dragon walk on Rinca or Komodo Island
- Visits to white sand beaches and snorkel stops at untouched coral gardens
- Dramatic island landscapes and unforgettable sunsets on deck
