

EMPEROR RAJA LAUT

Komodo National Park aboard Emperor Raja Laut

Labuan Bajo to Labuan Bajo | Central, southern and northern Komodo

Komodo National Park has reefs and small islands that teem with life, fed by the currents between Komodo and Rinca.

Manta rays and turtles are a chance in the central park, where a famous pinnacle is covered in life.

In the cooler, nutrient rich waters of the south, around Padar, the manta action is the highlight.

A climb to a look-out gives the view over the park, and there are beautiful beaches.

The last morning is for the Komodo dragons of Rinca Island, seen in their natural habitat.
