Komodo, Moyo & Bali

Bali to Labuan Bajo | Nusa Penida, Moyo, Sangiang and Komodo

This route builds up to Komodo, starting at the volcanic island of Sangiang, where a beautiful coral garden sits at the foot of a volcano and bubbles from underwater vents rise from the black sand.

Satonda brings a swim in a crater lake, a closed ecosystem where one species of seaweed, sea snail and blenny live together.

Then come the classic Komodo straits, where a pinnacle rising from the depths concentrates large amounts of sea life.

Soft coral pinnacles are crowded with schools of fish, and an underwater mountain is literally covered in marine life and invertebrates.

Fruit bats stream out at sunset to close the trip.
