

SAMAMBAIA

Raja Ampat South and Central, short cruise

Sorong to Sorong | Farondi, Daram, Yillet, Wayil, Fiabatjet and Boo

Misool in the south of Raja Ampat, where the reefs are covered in soft coral in all the colours you can imagine.

Around Farondi there are big sea fans, a huge swim through and a cavern, and when the silversides are abundant the mobulas come in to hunt.

Daram is a no-take zone where the marine life is abundant and most colourful, and a pinnacle off Yillet is home to resident grey reef sharks.

Fiabatjet has more fusiliers than anyone could possibly count, with jacks, trevallies, barracudas and sharks.

The last big day brings even bigger sea fans, and a cleaning station where oceanic mantas make the place truly magic.

THE TRIP

How a Samambaia cruise works

This is a sample itinerary for a seven night cruise from Sorong to Sorong. It is just to give you a general idea and is subject to change with the weather and other conditions. Popular dive sites are named, and the crew has secret spots as well, which you learn about during the cruise.

The decision on the itinerary is made by the Cruise Director as the boat cruises, and is based on the weather, the dive conditions, the requests of guests and the schedules of other liveaboards, which the boat tries to stay away from. There are some constants on every cruise:

- Three day dives of at least one hour each
- One sunset or night dive, unless the boat has a serious number of miles to cover overnight
- Scenic rides through lagoons and coves in the tenders
- Trekking to breathtaking viewpoints

- Visits to secluded beaches
- Excursions to traditional villages
- Whale watching
- Water action such as wake boarding and water skiing

Raja Ampat can be cruised in three ways: north only, south only, or north and south combined. This short sample is for the south.

THE DIVING

Diving and snorkelling

HOW THE DIVING WORKS

The Cruise Director leads the diving programme and four dive masters go with guests on the dives, usually with one guide to every four divers. All dives are no decompression dives within your certification level, and solo diving is not allowed. Nitrox is included.

Every diver carries a GPS marine rescue device for the whole trip, the dive staff are trained in Emergency First Response and oxygen is on board. Two tenders take the divers to the sites and the crew looks after the transfer of dive gear by speedboat.

THE AREA AND THE CONDITIONS

The best time to dive Raja Ampat is October to April, with near flat seas, warm sunny days and the occasional rain shower. The first dives are often around Wai island, about two hours by boat from Sorong. Some dives are timed for slack tide and the currents can occasionally be challenging, but the stronger currents bring better visibility, blooming corals and more fish activity.

Raja Ampat lies in the heart of the Coral Triangle and has over 1,400 fish species and almost 600 coral species, about three quarters of all the coral species known. Its name means Four Kings, after the four main islands of Waigeo, Batanta, Salawati and Misool, surrounded by more than a thousand smaller islands.

WATER TEMPERATURE

Water temperature across Indonesia is typically 26 to 30 C all year. During the monsoon, from December to February, it is about 27 to 29 C. A 3 or 5 mm wetsuit is usually enough, and a hood helps to avoid ear problems.

SNORKELLING

Indonesia's warm waters suit snorkelling, and the day by day notes point out the places where snorkelling is a good option.
