

SEAFARI EXPLORER 2

Special South

Male to Kooddoo or Kooddoo to Male | North Male, Ari, Meemu, Thaa, Laamu and Gaafu Alifu

The southern Maldives are all about moving water, with drift dives through channels full of trevally, tuna and grey reef sharks.

Manta ray cleaning stations sit over walls and reef slopes, and on an outgoing current many mantas gather over sand.

Whale sharks can be watched and snorkelled with at night.

Squadrons of eagle rays make one channel an adrenaline dive, while overhangs in another are covered in yellow soft coral.

Manta snorkelling

Snorkelling sessions with manta rays are planned at secret places, and the senior instructor decides the route and the dive sites with the captain each week, depending on the currents, the tides and the weather.

Diving rules

Every activity is supervised by a qualified CMAS or PADI instructor from the Seafari team, who briefs the site, the currents, the wildlife and the safety rules before each dive. The senior instructor can require in-water supervision, or stop a diver whose level is not enough to dive safely.

Check out is at 07:00 on the last day, with the airport transfer in the morning.
